## OPERATING INSTRUCTION

### Opening the undercarriage:

Place folded undercarriage on wheels. To open the undercarriage stay between the rear wheels and hold tightly handle. Move handle up and backwards until the handle folding release is fully locked in its end position. To check the locking position, move upwards the handle. The undercarriage must not start folding. Care must be taken to avoid trapping fingers, when opening the undercarriage!

### Fitting the seat in the driving direction:

Place the seat exactly into frame seat fittings. By pushing the seat down, rotate the right seat lock levers till it locks in position, repeat the action with the left seat lock lever. Finally check the seat locking by slight lifting of seat. Seat must not separate from the interface frame (see picture 1).

### Fitting the seat against the driving direction:

Place the seat against the driving direction follow the same procedure like in previous chapter except of turning the seat 180° to be facing back to front.

### Seat reclining adjustment:

Hold the seat tightly. Loose seat reclining adjustment and set the position of the seat. Tighten properly the adjustment to fix the position. Turn reclining adjustment handle vertically into the safest position by pulling and rotating.

### Seat and footrest set depth adjustment:

To adjust the dimensions of the seat and the footrest set position, the seat must be without an occupant and empty. Loose both seat depth adjustments bolts as well as both adjusting nuts and footrest set depth adjusting bolt. Set the depth of the seat by pulling or pushing. Tighten properly all adjusting bolts and nuts.

### Backrest height adjustment:

Loose and take off all the backrest height adjustment bolts. Set the height of the backrest by lifting or pressing down. Assemble and tighten properly all adjustment bolts.

### Backrest reclining:

Hold the seat backrest firmly. Loose backrest reclining adjustment and set the position of backrest. Tighten the adjustment properly.

### Footrest height adjustment:

Hold the footrest. Loose the footrest height adjusting bolts. Set the position of footrest and tighten properly both adjusting bolts. Turn adjusting bolts small handles into the safest position by pulling it and rotating.

### Footrest set reclining:

Press both press buttons on footrest hinge simultaneously and adjust the angle position of footrest. Free both buttons and set the position of footrest to allow the hinges to be locked.

### Operating the Parking Brake:

To brake the wheels press fully the brake connecting rod. To disengage the parking brake lift fully the brake connecting rod. (see enclosed picture 2).

### Safety Bar:

To fit the safety bar put both ends of safety bar in seat side tubes at once. To take out the safety bar, press press-pin release and lift the safety bar up.

### Getting into the stroller:

Ensure the parking brake is on, to easy getting into the stroller adjust footrest position as far under the seat as it is possible and fold the footrest base (see enclosed picture 2); if possible, place the back of the stroller against a wall or immovable object (alternatively, another helper may hold the stroller steady); place child carefully into the stroller, fasten all

immobilisation accessories and the safety bar, adjust the footrest into comfortable position. The child must always feel comfortable in the stroller.

**Getting out of the stroller:**

Ensure the parking brake is on; to easy getting out of the stroller adjust footrest position as far under the seat as it is possible and fold the footrest (see enclosed picture 2. ) ; if possible, place the back of the stroller against a wall or immovable object (alternatively, another helper may hold the stroller steady); unfasten all immobilisation accessories and the safety bar and lift the child carefully.

**Negotiating the kerb or single step:**

Down - take the front wheels to the edge of the kerb, hold the handles firmly and tip the stroller backwards and balance on the rear wheels, take the rear wheels to the edge of the kerb, lower the stroller down the kerb on its rear wheels. Never tip the stroller forward at a kerb.

Up - take the front wheels to the kerb. With a firm grip on the handles, tip the stroller backwards and place the front wheels on top of the kerb. Position the rear wheels at the kerb bottom and lift to the upper level.

**Negotiating Steps:**

- make use of ramps and lifts when they are available
- where possible steps should not be avoided, if there is no alternative to negotiating steps then ensure at least one helper is available to give assistance
- do not attempt to take the stroller up or down a flight of steps unless you and your helper are sure you have control of the stroller and can take the weight of its occupant
- during this operation, the attendant and helper must be well balanced and have secure grip on the stroller
- the attendants hands must be inside the handle straps at all time
- take rests in regular intervals
- do not lift the stroller with safety bar or footrest

**going down steps** - position the stroller squarely with the front wheels on the top step, tilt the handle backward and push the stroller forward until the rear wheels are at the top step; the helper stands in front, steadies and lowers the stroller by gripping the front frame; take the weight and lower the rear wheels down the step, continue step by step to the bottom. (see picture 3)

**going up steps** - position the stroller squarely with the rear wheels against the bottom step, tilt the stroller backward and raise to the next step; the helper stands in front, steadies and lifts the stroller by gripping the front frame; continue step by step to the top. (see picture 4)

**Folding the stroller:**

Set the position of footrest horizontally, fold the footrest plate and take off the safety bar. Pull backrest as far as possible forward towards the seat base. (We recommend to take out the exceeding fixing accessories, to decrease the size of folded stroller) Lift the handle folding release movable part, lift the handle release safety clip and fold the handle forward towards the front wheels. (see picture 5, 6). By folding parking brake must be released!

**Taking off the seat:**

To disassemble the seat, loosen both seat-locks and lift the seat. The seat must be without an occupant and empty.

**Folding the undercarriage:**

Prior folding the undercarriage, take off the seat. Lift the handle folding

pic.6

pic.4

pic.7

release movable part, lift the handle release safety clip and fold the handle forward towards the front wheels.

(see picture 5, 6). By folding parking brake must be released!

**Seat upholstery attaching:**

Seat upholstery is fully detachable and washable by lower temperature (max. 40°C).

**Backrest cover** - put on the cover top part over the upper edge of backrest, cover bottom end slip into the gap between the backrest and seat base. Secure the lower end of fabric by velcro (dry zipper at the back of the backrest).

**Seat base cover** - put on the sides one by one, precise the cover position and fix by dry zipper by pushing

**MAINTENANCE INSTRUCTION**

Your stroller has been designed to a high standard and with correct use and maintenance will give many years of trouble free service.

- regularly inspect handle folding release, safety bar fittings, locking devices, catches, footrest, joints fixings and handle release safety clip to ensure they are secure and in full working order
- brakes, wheels, tyres are subjects to wear and should be replaced if necessary by a service centre approved by the stroller supplier
- if the stroller is damaged or in need of any repair, only the approved repair centres are allowed for this services. Alternatively, PATRON Bohemia s. r. o. customer department is available for product information
- only PATRON Bohemia s. r. o. replacement parts should be used on this stroller
- should parts of your stroller become stiff or difficult to operate, ensure that dirt is not the cause, apply a light application of a spray lubricant e. g. WD 40 (do not use oil or grease). Ensure that the lubricant penetrates between the components but do not overspray as this may encourage the accumulation of dirt. Wipe off any spray excess. Regular lubrication of moving parts will extend the life of your stroller and make opening and folding easier.
- make sure that you are familiar with the operation of the stroller. It should always open and fold easily. If it does not, do not force the mechanism - stop and read the instructions
- wheels, plastic and metal parts may be sponged clean with warm water and mild detergent.
- the seat fabric can be washed by hands in washing machine (max. 40°C)
- never clean with abrasive, ammonia based, bleach based or spirit type cleaners.
- after exposure to damp conditions, dry off with a soft cloth and leave fully open in warm environment.
- store your stroller in a dry, safe place
- we recommend that the stroller is checked by an approved service centre every 12 month
